Do You Have Dreams ?

WHAT IS P2P

A peer-to-peer network is a simple network of computers. It first came into existence in the late 1970s. Here each computer acts as a node for file sharing within the formed network. Here each node acts as a server and thus there is no central server in the network. This allows the sharing of a huge amount of data. The tasks are equally divided amongst the nodes. Each node connected in the network shares an equal workload. For the network to stop working, all the nodes need to individually stop working. This is because each node works independently. 100% Safe Project Fund Not Deposit IN Company Account

ROWD FUNDING

d funding is the use of small amounts of capital

a large number of individuals to finance a new

ess venture. Crowd funding makes use of the

accessibility of vast networks of people through

l media and crowd funding websites to bring

tors and entrepreneurs together, with the potential

crease entrepreneurship by expanding the pool of

tors beyond the traditional circle of

rs, relatives, and venture capitalists.
